Cattle prod education is the name I’ve given to symptoms of physical abuse that I’ve had to endure from my attackers. To me, the presence of symptoms has meant that the Ascension project is still incomplete with a need for more education (provided in PDF files like this one). Since 2009, I’ve been reciting a Prayer request that asks God to give my attackers an amplified version of whatever abuse I receive. I’ve called the amplified version “amplified contextual blowback” because the symptoms are varied. This page of notes explains that artificial genet-
ics have caused the following undesirable traits:

- Racism
- Misogyny (hatred of women)
- Misanthropy (hatred of humans)

Prayers (including a Prayer request that asks God to convert artificial genetics to God-created versions), dowse (asking the question “Am I ok?”) and God Scores will help eliminate these traits.

This page of notes is necessary because racists, misogynists and misanthropes often do not understand that they have these traits.

**Percentages in Artificial Races**
The numbers in the population with these traits are startling. Each trait shows up in approximately 60% of the population and approximately 30% have all three traits. Grey seniors (those who have 30% of the original Sirian genetics) and Grey juniors (artificial race members) had similar percentages in 2009. However, due to their maturity level (a God Score of 9 on a scale of 1 to 10 at the beginning of the Ascension project), only 20% of their race have these traits. Gray juniors needed Cattle Prod education, Grey seniors did not. Eighty percent of both groups now have a maturity level of 20.

When I dowse the question:

“Am I a racist?” a “No” was returned.

“Am I a misogynist?” a “No” was returned.

“Am I a misanthrop?” a “No” was returned.

Everyone needs to dowse these questions. If a “Yes” is returned, dowse a number on a scale from 1 to 10 (the score may go beyond 10). Also dowse your maturity level. Dowsing helps me to understand that a maturity level of 20 is required for a “No” to be returned in all three categories. My maturity level is 25. God’s maturity level is 100.

**Forecast for Development**
When I dowse the question, “What percent of artificial will reach a maturity level of 20?” The number 20% is returned. Obstacles to development include a lack of role models in life, or in fictional entertainment. Without God’s framework for living (the Golden Rule, or “the Right Thing to Do” is mentioned in older television shows such as The Andy Griffith Show, The Cosby Show, 7th Heaven, The Waltons, M.A.S.H., Touched By An Angel, Dr. Quinn Medicine Woman, Little House on the Prairie, Star Trek: The Next Generation, and several others eliminated in the “rural purge”), behavior can shift in a negative direction.

Without training or direction concerning right and wrong behavior, some adults and many children will not “know what they don’t know.” The percentages explained in this document may also be confusing. In class work, or in housing co-ops, purchase wooden letters to represent racism (R), misogyny (M painted pink) and misanthropy (M left unfinished). Use velcro to attach a laminated number with a God Score, and drill holes for string to create necklaces. In a room with participants wearing one or more necklaces, it will be clear that some people have less “baggage” than others. When I ask, “Will necklaces need to be worn longer than the duration of a class or group meeting?” a “Yes” or “No” is returned. When I ask, “Does this mean people who are slow to improve may need to wear necklaces longer?” a “Yes” is returned.

Mokos do not have problematic traits that have turned up in those with artificial genetics.

80% of Greys have reached a maturity level of 20. Ninety percent had a maturity level of 9 in 2009.

Wooden letters are sold at Walmart, Target and craft stores. Velcro is available at JoAnn Farbric or online.
