Concentration

- 2 to 5 players, shuffle in a 2nd deck for more players
- **Objective:** Turn over the most pairs of matching cards. **Pairings:** Any number pairing regardless of color.
- Each player takes turns flipping two cards face-up to see if they are of the same number and color (e.g. 9♠ and 9♣, or Q♥ and Q♦), then that player wins the pair, picks them up and gets another turn. If the cards are not of the same number and color, they are turned back facedown and it becomes the next player’s turn to pick two cards.
- The game continues until players have picked up all the pairs; the winner is the player with the most pairs.
